Test Requested

Result

Per applicant's request, Design drawing review for the 1-3 layer of the drawings, with reference to the selected requirement(s) of the below standard, Refer to test result page(s) for details:

EN 1176-1:2017+A1:2023 Playground Equipment and surfacing Part 1: General safety requirements and test methods

See result

EN 1176-3:2017 Playground equipment and surfacing Part 3: Additional specific safety requirements and test methods for slides

See result

EN 1176-10:2023 Playground Equipment and surfacing Part 10: General safety requirements and test methods for fully enclosed play equipment

See result

Remark: This report is only based on the dimensional inspection of the product structure indicated on the drawings

Results:

EN 1176-1:2017+A1:2023 Playground Equipment and surfacing Part 1: General safety requirements and test methods

Scope:

1. This part of EN 1176 specifies general safety requirements for permanently installed public playground equipment and surfacing. Additional safety requirements for specific pieces of playground equipment are specified in subsequent parts of this standard.
2. This part of EN 1176 covers playground equipment for all children. It has been prepared with full recognition of the need for supervision of young children and of less able or less competent children.
3. The purpose of this part of EN 1176 is to ensure a proper level of safety when playing in, on or around playground equipment, and at the same time to promote activities and features known to benefit children because they provide valuable experiences that will enable them to cope with situations outside the playground.
4. This part of EN 1176 is applicable to playground equipment intended for individual and collective use by children. It is also applicable to equipment and units installed as children's playground equipment although they are not manufactured as such, but exclude those items defined as toys in EN 71 and the Toys Safety Directive.
5. It is not applicable to adventure playgrounds with the exception of those items which have been commercially sourced.
NOTE Adventure playgrounds are fenced, secured playgrounds, run and staffed in accordance with the widely accepted principles that encourage children's development and often use self-built equipment.
6. This part of EN 1176 specifies the requirements that will protect the child from hazards that they might be unable to foresee when using the equipment as intended, or in a manner that can be reasonably anticipated.
7. The use of electricity in play equipment, either as a play activity or as a motive force, is outside the scope of this standard. The attention of users is drawn to European and local national standards and regulations which are to be complied with when using electricity.
8. Play equipment placed in water and where water can be seen as impact attenuating surfacing is not fully covered by this standard and additional risks are associated with wet environments.
9. The risk of exposure to excessive levels of UV radiation is not covered in this standard.

Maximum user weight: / Total number of users: /

EN 1176-3:2017 Playground equipment and surfacing Part 3: Additional specific safety requirements and test methods for slides

Scope:

1. This European Standard specifies additional safety requirements for slides intended for permanent installation for use by children. The aim is to provide protection to the user against possible hazards during use. Where the main play function is not sliding, the relevant requirements in this part of EN 1176 may be used, as appropriate.
2. This document is not applicable to waterslides, roller ways or slide installations where auxiliary equipment such as mats or sledges are used. This document is not applicable to inclined surfaces that do not contain and guide the user, e.g. banister rails (inclined parallel bars).

Clause	Description	Result
4	Safety requirements	
4.1	General	Pass
4.2	Access	Pass
4.3	Starting section	
	4.3.1 Length and angle Remark: No review was conducted as the client did not provide the corresponding data.	See remark
	4.3.2 Guarding section	Pass
	4.3.3 Width	Pass
	4.3.4 Lateral protection (sides)	Pass
4.4	Sliding section	
	4.4.1 Length and angle Remark: No review was conducted as the client did not provide the corresponding data.	See remark
	4.4.2 Width	NA
	4.4.3 Sides and profile of the slide	Pass
4.5	Run-out section Remark: No review was conducted as the client did not provide the corresponding data.	See remark
4.6	Surface of the slide	Pass
4.7	Free space	Pass
